Woodworking: Sculptural and Functional Wood
For students entering grades 5–7

During this week-long half-day workshop students will spend time in the shop using hand and power tools to create decorative and functional objects out of wood. Students will have extended time to develop their skills and creative ideas. We will practice wood joinery, additive and reductive sculpture techniques and a variety of surface treatments. Students will leave this class with a greater understanding of the woodshop and all the potential uses for wood tools. Students will also come home with many new creative projects like hinged boxes, portraits, block prints and mechanical sculptures!

Space is limited and a minimum number of students is required for this workshop to run.

Dates: July 13-17, 2020

Hours: Monday–Friday, 9 a.m.–11:30 a.m.

Cost: $400 (includes all supplies)

Program Instructor: Katie Palmer, Art Department Faculty

Ms. Palmer joined the faculty at the Francis Parker School in 2018 to teach Shop and Photography. Prior to that, she was department chair and visual arts teacher at the Harvard-Westlake School for 13 years. Ms. Palmer received her BFA from the Rhode Island School of Design and her MAT from Brown University. She loves hanging with her family, making her own art, and doing yoga!
